

# BAUM INFORMER

Volume 1, Issue 4

August 2009

## **BAUM TO SHOW BaumPrint 18**

**Baum will introduce its NEW BaumPrint 18 small-format offset press at PRINT 09 in Chicago.**

Since 1917 Baumfolder Corporation, Sidney, Ohio, has designed and manufactured folding machines and related bindery equipment for the graphic arts industry. Now Baum has added small-format offset printing to complete their full line of high-quality, durable products designed to increase productivity & profitability. With its high level of automation, the BaumPrint 18 provides excellent conditions for cost-effective production of single and multiple color offset printing jobs.

Mr. Ulrik Nygaard, President of Baumfolder Corporation, proudly states "The BaumPrint 18 is made in the USA by Baumfolder Corporation at the Sidney, OH facility that also provides the technical and service parts support for this product to the factory authorized BaumPrint 18 dealers.

**Stop by Booth 4060 to see this new press in action.**

## **BAUM WILL HAVE THIS EQUIPMENT AT PRINT 09**

In addition to the new BaumPrint 18 we will have.

### **BAUM TABLE TOP FOLDERS**

Baum will be showing its line of manual and automated table top folders including the **BAUM 714XLT** with the new **Turbo Wheel Feeder**. This will be the first time the turbo wheel feeder has been shown at a major trade show. You definitely need to see the Turbo Wheel in action.

### **BAUM MEDIUM FORMAT FLOOR MODEL FOLDERS**

Baum will be showing its medium format floor model folders allowing you to see the manual version, i-fold version and the automated version. Ask us to help you make the right choice.

### **BAUM LARGE FORMAT FLOOR MODEL FOLDERS**

Baum will also be showing its large format folders. These are available both as a 4 plate and a 6 plate model. We will be showing a unique application demonstrating how you can use your 8-page right angle folder to serve two purposes. First as a right angle folder in conjunction with the parallel fold unit or you can use it to fold scored sheets coming out of the Baum PS Creaser.

### **BAUM PAPER CUTTERS**

Make sure you check out our latest version of our Baum Cut Paper Cutters. Let us show you the latest features.

### **BAUM PAPER DRILLS**

Stop by and talk to us about our line of Single spindle and multiple spindle Paper Drills. Baum D5 Drills multiple spindle drills have an exclusive Medical Form drilling capability.

### **BAUM PS CREASER**

Check out the Baum PS Creaser. We will be showing you how you can utilize your existing 8-page folder to fold scored sheets from your Baum Creaser.

**Make sure you stop by our booth  
#4060 at Print 09.**

## Ask Jim

About this column. Jim Brandewie has many years experience operating, building, rebuilding and most recently in selling Baum folders. In this column Jim will select a commonly asked question concerning the operation of one of our Baum folders that was received from our customers and reply to it. If you would like to submit a question to Jim you can e-mail him at [james.brandewie@baumfolder.com](mailto:james.brandewie@baumfolder.com)

Dear Jim:

As a folder operator do you see any value to me attending trade shows such as PRINT 09?

Rod from Chicago

Dear Rod

I view trade shows such as PRINT, to be extremely beneficial to the folder operator and anyone who works in the Graphic Arts Industry. Where else can you find the most technical expertise from all the various manufactures all in one place at the same time?

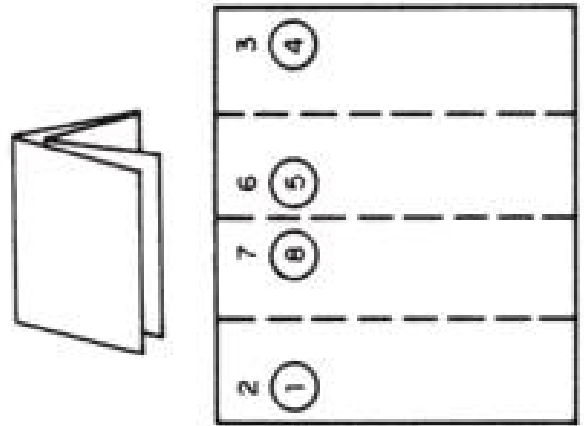

By watching the various Demo's and talking to the personnel manning the booths gives you the opportunity to learn more in a few hours than you might be able to learn in months on an individual basis. YES if you get an opportunity always attend these shows if at all possible.

Jim

## FEATURED IMPOSITION of the MONTH

We will be featuring a different imposition that can be folded on your Baum floor model folder in each issue of the Baum Informer. This month's imposition is a "8-page parallel fold" which is also known as a "double parallel" fold.

These instructions are written for a folder with gap sets but could be modified for an older machine with manual roll settings.

### 8-PAGE PARALLEL (double parallel) FOLD

- 1) Set the fold stop in the #1 fold plate for  $\frac{1}{2}$  of the length of the sheet being folded.
- 2) Set the fold stop in the #2 fold plate for  $\frac{1}{4}$  of the length of the sheet being folded.
- 3) Close the deflector on the #3 and #4 plate. (if you have a #4 plate).
- 4) Insert one thickness of paper you are going to fold in the #1 gap sets ( both sides)
- 5) Inset two thickness of paper you are going to fold in the #2 gap sets ( both sides)
- 6) Inset four thickness of paper you are going to fold in the #3, #4 and #5 gap sets ( both sides)

Additional impositions can be found on the Baumfolder web site at [www.baumfolder.com](http://www.baumfolder.com) . Click on Technical Support and select something to use sheets.
